We have received the first 10 of 20 patients by transport. Second trip is underway for the remainder of the patients we are accepting. Equipment needs are being taken care of with each patient. Rooms were admission ready. We are awaiting paperwork at the facility. Nurse management is standing by for that.

Update on our numbers:

We are in the process of transporting 54 residents to Heritage Hall Blacksburg. Several trips will be made. We are also in the process of transporting 20 residents to Rural Retreat - 2 trips. 6 are being sent to Blue Ridge Therapy Connection - 4 of which are memory care. 1 memory care to Abingdon. 5 will be sent to the Virginia Veteran's Care Center. 10 are being sent home. And now 4 will be sent to Liberty Ridge.

Organization Types:
Long Term Care Facility

EOP activated, administrator is incident command. Our facility is not able to care for residents that are Covid-19 positive, and we do not have a memory care unit. Staff state important pieces of information to note during a potential influx of new residents is face sheet information to have responsible party contacts, medications present, admissions ready to take photographs with name labels to identify residents, rooms labeled with appropriate names to ensure enough space, physician orders - to know about dietary orders and medications for example, a system to sign off with the transporters bringing residents to our facility for accountability, a means to do head to toe assessments upon arrival, and a means to have consent to treat documents signed and Covid 19 tests upon arrival. Will provide more information as staff provide input.

EXERCISE EXERCISE EXERCISE

We received 6 residents at 202pm via transport vehicle. Paperwork received and report obtained from facility staff. Examined bed availability, staffing needs, need for additional food items and supplies, assessed room readiness, and prepared nursing staff for influx of patients. Verified equipment needs with DSF prior to departure from facility.

KHCC did not receive any residents but we did set up Command Center and activated all emergency updates with VHASS and with our own facility. We started the process of setting up a hot unit for additional 6 beds (our 110% occupancy) in our activity room and library if needed. Contact two DME companies for additional hospital beds and privacy screens but both couldn't guarantee same day delivery. Alerted all staff about may be receiving influx of residents.

If your facility receives patients:

- Please send your VA influx of resident's logs to your RHCC once you've received your patients. Send to Nswrhcc@gmail.com (NSPA) or Farswrhcc@bvu.net (FARSW)
 - What time did patients arrive?
 - How many patients did you accept?
 - Did you receive paperwork from the DSF?
 - Have you emailed/attached the RHCC your VA influx of residents log?
 - list what actions you took to accept the new patients
 - If your facility is not receiving patients, please provide an update on what actions you completed today. You can add a comment or attach a document.

Contacted NW Region Coalition with a request for bed status for memory care bed availability. Received a message back from NW Region (Becky) that they would be glad to participate. Checking bed status. Advised it looks as if it is taken care of with NSW and FarSW regional assets. Much appreciative of the assistance.
